DETAILED ACTION

1. The withdrawal of claims 1-3 has been entered.
2. Claims 4-16 are examined on the merits.

OBJECTIONS

3. The abstract of the disclosure is objected to because said abstract is greater than 150 words. Applicant is required to submit a new abstract on **a separate sheet of paper**. See MPEP § 608.01(b).
4. The specification [0001] recites the U.S. Provisional Patent Application No. 60/532,384 with the filing date of December 29, 2003, which is inconsistent with the filing date the Office has for said Provisional application. It is noted the Office has the filing date of December 26, 2003 for the U.S. Provisional Patent Application No. 60/532,384. Applicant is required to amend the specification accordingly.
5. In paragraphs, [0013], [0035], [0056], [0099], the Patent Application No. 2010044827 has been recited. The Application No. has been interpreted as a typographical error. The correct Application number is 20010044827. Further, Applicant is required to update the status of said Application because said Application has been issued as Patent No. US 7032006 B2.
6. Claims 4-7, 9, and 10 are objected to because said claims do not end with a period.

CLAIM REJECTIONS - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2168

8. Claims 4-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
9. Claims 4-16 lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material per se as exemplified by Figures 2 and 3.
10. Descriptive material can be characterized as either “functional descriptive material” or “nonfunctional descriptive material.” Both types of “descriptive material” are nonstatutory when claimed as descriptive material per se, 33 F.3d at 1360, 31 USPQ2d at 1759. When functional descriptive material is recorded on some computer-readable medium, it becomes structurally and functionally interrelated to the medium and will be statutory in most cases since use of technology permits the function of the descriptive material to be realized. Compare *In re Lowry*, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994)
11. Merely claiming nonfunctional descriptive material, i.e., abstract ideas, stored on a computer-readable medium, in a computer, or on an electromagnetic carrier signal, does not make it statutory. See *Diehr*, 450 U.S. at 185-86, 209 USPQ at 8 (noting that the claims for an algorithm in *Benson* were unpatentable as abstract ideas because “[t]he sole practical application of the algorithm was in connection with the programming of a general purpose computer.”).

Claim Rejections - 35 USC § 112

Art Unit: 2168

12. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

13. Regarding claim 4, line 19, the phrase "like..." renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

The same issue is present in claim 5, line 2.

14. Regarding claim 8, line 4, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d). The same issue is present in claim 9, line 4.

15. Regarding claim 9, line 6, the phrase "etc. that" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d). The same issue is present in claim 9, line 4.

CONCLUSION

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

17. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

18. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2168

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
